

Specialist Knowledge for Teaching Mathematics Core Maths Teachers

Sign Up

Are you in your first two years of teaching Core Maths and teaching a Core Maths class during the academic year 2024/25?

This programme will give you the opportunity to work collaboratively with your peers, guided by an expert Lead, to develop the specialist knowledge you need to teach Core Maths effectively. You will gain understanding of the philosophy of Core Maths and how technology can be used to support Core Maths teaching. Your students will have raised awareness of the use of maths and statistics in everyday life and you will plan lessons to promote student understanding, confidence and progress.

The programme forms part of the overall Advanced Mathematics Support Programme (AMSP) and Maths Hubs Core Maths professional development offer and is based on six key themes.

15th Jan
2025
14:30-17:00

Fermi
Estimation
and Modelling
